

**Weekly Market Insights:
Investors Anticipate Fed Rate Change**

Stocks notched a solid gain last week in a mega-cap, tech-led rally bolstered by positive inflation news.

Dow 40,000

The week began quietly as market averages traded in a tight range, awaiting fresh inflation news.

On Tuesday, markets rose steadily throughout the day after digesting a mixed wholesale inflation report.¹

The next day, a cooler-than-expected Consumer Price Index (CPI) report sparked a broad-based rally as the upbeat news raised investors' hopes for a rate cut. The Nasdaq Composite and Standard & Poor's 500 (which ended above 5300 for the first time) closed the day up 1.4 percent and 1.2 percent, respectively. Meanwhile, the bellwether 10-year Treasury yield fell to 4.35 percent.^{2,3}

Investors took a break as the week ended, mostly yawning at mixed economic data. Notably, the Dow closed just above 40,000 on Friday.

Inflated Expectations

With the two critical inflation updates last week, attention shifted to the Federal Reserve's next steps with interest rates.

The top-level CPI numbers (known as headline inflation) tend to be less important than what's underneath: core inflation (CPI minus volatile food and energy prices) in the Fed's eye. Core CPI came in at 0.29 percent for April, just below the 0.30 percent from Wall Street. It was the first time the core CPI was lower than forecasts in three months. The news revived speculation that the Fed might consider a rate adjustment as early as September.^{4,5}

Starting a New Hobby? These Tips Can Help You Understand the Tax Situation

Whether you pick up painting or cook new concoctions in your kitchen, starting a new hobby is always fun and a great avenue to learn something new. However, there are some important tax considerations when starting a new hobby, especially if you are considering turning your newfound passion into a business.

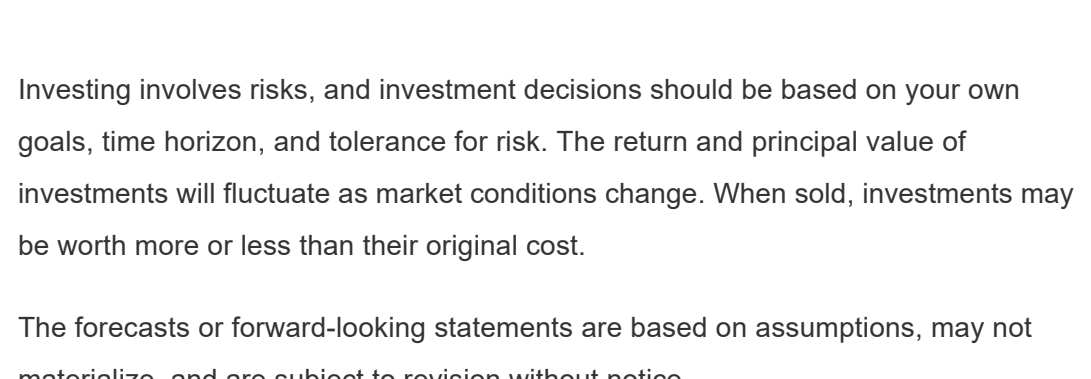

Taxpayers must report any income earned from hobbies, even if it does not involve a licensed business. While businesses should make a profit, hobbies are primarily recreation. The following nine factors can guide you in determining whether a hobby could also be considered a business, according to the IRS:

- Whether you execute the activity in a businesslike manner and maintain complete and accurate books and records.
- Whether you have personal motives in performing the activity.
- Whether the time and effort you expend in the activity indicate that you intend to make it profitable.
- Whether you depend on income from the activity for your livelihood.
- Whether your losses are due to circumstances beyond your control (or are normal in the startup phase of your type of business).
- Whether you or your financial professional understand how to parlay the activity into a successful business.
- Whether you successfully made a profit through similar activities in the past.
- Whether the activity will make a profit in some years and how much profit it will make.
- Whether you can profit from appreciating the assets used in the activity.

You can also deduct some of the expenses associated with your hobby. Within certain limits, taxpayers can typically deduct ordinary and necessary hobby expenses. An ordinary expense is common and accepted for the activity, while a necessary expense is appropriate.

3 Stretches for Your Lower Back

We spend so much time sitting in our cars and at our desks that it's no wonder that our lower backs can become tight and even sore. These three lower back stretches will help improve your flexibility and recovery and may even help if you have lower back pain.

- **Figure 4 Stretch:** The Figure 4 stretch will stretch your glutes, hamstrings, and lower back. To do the stretch, lay on your back with both feet on the ground. Then, cross your left foot over your right knee. Gently bring your right leg to a 90-degree angle. If you would like to increase the intensity of the stretch, grab the back of your thigh and bring your right knee toward your torso. Repeat on the other side.
- **Inner Thigh Stretch/Butterfly Stretch:** This stretch addresses your inner thigh and lower back. Sit on the ground and bring your feet together in front of your knees with the soles of your feet touching. Let your knees fall to the side. To increase the stretch, bring your feet closer to your torso.
- **Pigeon Pose:** To assume the pigeon pose, bring one leg to 90 degrees from your torso and stretch the other leg behind you so your right calf is perpendicular to your hips. To intensify the stretch, bend at the hips over your front leg. Repeat on both sides.

U.S. Treasury Notes are guaranteed by the federal government as to the timely payment of principal and interest. However, if you sell a Treasury Note prior to maturity, it may be worth more or less than the original price paid. Fixed income investments are subject to various risks including changes in interest rates, credit quality, inflation risk, market valuations, prepayments, corporate events, tax ramifications and other factors.

International investments carry additional risks, which include differences in financial reporting standards, currency exchange rates, political risks unique to a specific country, foreign taxes and regulations, and the potential for illiquid markets. These factors may result in greater share price volatility.
